

EXAMPLE OF VALVES CONFIGURATION ▲

M172 VALVES

Compact and modular section valves hand lever operated, suitable to build manual control sets for airblast sprayers.

The new lever is prepared to stick on colored discs for an easy identification of the various sprayer operations. The operator can choose the color identification suitable to his needs.

The modular system of M172 allows to assemble as many sections as required. The set of valves can be easily assembled to our solenoid valves M 200.

- Max operating pressure: 40 bar / 580 psi
- Max. output: 80 l/min at 1.5 bar - 21 USGal/min at 22 psi
